

RT² Profiler PCR Array (384-Well Format)

Rabbit Molecular Toxicology PathwayFinder

Cat. no. 330231 PANZ-3401ZE

For pathway expression analysis

Format	For use with the following real-time cyclers
RT ² Profiler PCR Array, Format E	Applied Biosystems [®] models 7900HT (384-well block), ViiA [™] 7 (384-well block); Bio-Rad CFX384 [™]
RT ² Profiler PCR Array, Format G	Roche [®] LightCycler [®] 480 (384-well block)

Description

The Rabbit Molecular Toxicology PathwayFinder RT² Profiler[™] PCR Array profiles the expression of 370 key genes in at least 13 different biological pathways activated in response to experimental drugs under evaluation for their therapeutic efficacy. Profiling the expression of these genes facilitates characterization of the toxicological responses induced by such research drugs. Understanding these mechanisms can then guide chemical modifications to avoid the observed toxic responses rather than completely dismissing a class of experimental drugs otherwise effective at preventing or treating the target disease phenotype. All of the toxic response pathways represented by this array can be independent or interrelated. For example, inhibition of β-oxidation leads to steatosis, and uncoupling mitochondrial energy metabolism leads to apoptosis and necrosis. Treatments affecting reactive oxygen species metabolism or cellular redox status cause oxidative stress and induce antioxidant responses. These and other reactive chemicals also directly damage DNA or inhibit its repair activating DNA damage signaling and DNA repair pathways or apoptosis and necrosis under more extreme conditions of prolonged exposure or excess DNA, cell or tissue damage. Interference with protein synthesis causes endoplasmic reticulum stress and activates the unfolded protein response up-regulating heat shock protein and chaperone gene expression. Increased expression of the cytochrome P450 and other phase I drug metabolism enzymes occurs upon inhibiting or overwhelming their chemical modification activities. More severe and complex phenomena result when fatty acid and lipid metabolism (β-oxidation) is inhibited including the lipid storage disorders of steatosis, cholestasis, and phospholipidosis. Toxic responses in immune system cells bring about immunotoxicity and immunosuppression. Using real-time PCR, research studies can easily and reliably analyze the expression of a focused panel of genes on the array to determine which

molecular toxicological response pathways specific experimental drug candidates activate. Once the pathways involved are defined, further comprehensive surveys of more genes in those pathways can be performed using other application-specific or custom PCR Arrays designed for individual pathways.

For further details, consult the *RT² Profiler PCR Array Handbook*.

Sample & Assay Technologies

Shipping and storage

RT² Profiler PCR Arrays in formats E and G are shipped at ambient temperature, on dry ice, or blue ice packs depending on destination and accompanying products.

For long term storage, keep plates at -20°C.

Note: Ensure that you have the correct RT² Profiler PCR Array format for your real-time cycler (see table above).

Note: Open the package and store the products appropriately immediately on receipt.

Gene table: RT² Profiler PCR Array

Position	UniGene	GenBank	Symbol	Description
A01	N/A	XM_002712100	AASS	Aminoadipate-semialdehyde synthase
A02	Ocu.3170	NM_001082159	ABCB1	ATP-binding cassette, sub-family B (MDR/TAP), member 1

For optimal performance, RT² Profiler PCR Arrays should be used together with the RT² First Strand Kit for cDNA synthesis and RT² SYBR® Green qPCR Mastermixes for PCR.

Product	Contents	Cat. no.
RT ² First Strand Kit (12)	Enzymes and reagents for cDNA synthesis	330401
RT ² SYBR Green qPCR Mastermix (8)*	For 4 x 384 assays in 384-well plates; suitable for use with real-time cyclers that do not require a reference dye, including: Bio-Rad model CFX384; Roche LightCycler 480 (384-well); all other cyclers	330501
RT ² SYBR Green ROX™ qPCR Mastermix (8)*	For 4 x 384 assays in 384-well plates; suitable for use with the following real-time cyclers: Applied Biosystems models 7900HT, ViiA 7 (384-well blocks)	330521
RT ² SYBR Green Fluor qPCR Mastermix (8)*	For 4 x 384 assays in 384-well plates; suitable for use with the following real-time cyclers: Bio-Rad models iCycler®, iQ™ 5, MyiQ™, MyiQ2	330511

* Larger kit sizes available; please inquire.

RT² Profiler PCR Array products are intended for molecular biology applications. These products are not intended for the diagnosis, prevention, or treatment of a disease.

For up-to-date licensing information and product-specific disclaimers, see the respective QIAGEN kit handbook or user manual. QIAGEN kit handbooks and user manuals are available at www.qiagen.com or can be requested from QIAGEN Technical Services or your local distributor.

Trademarks: QIAGEN®(QIAGEN Group); Applied Biosystems®, ViiA™, ROX™ (Applied Biosystems Corporation or its subsidiaries); Bio-Rad®, CFX384™, iQ™, MyiQ™. iCycler® (Bio-Rad Laboratories, Inc.); Roche®, LightCycler® (Roche Group); SYBR® (Molecular Probes, Inc.).
