

RT² Profiler PCR Array (384-Well Format)

Human Ubiquitin Ligases

Cat. no. 330231 PAHS-3079ZE

For pathway expression analysis

Format	For use with the following real-time cyclers
RT ² Profiler PCR Array, Format E	Applied Biosystems [®] models 7900HT (384-well block), ViiA [™] 7 (384-well block); Bio-Rad CFX384 [™]
RT ² Profiler PCR Array, Format G	Roche [®] LightCycler [®] 480 (384-well block)

Description

The Human Ubiquitin Ligases RT² Profiler PCR Array profiles the expression of 370 ubiquitin ligase genes representing potential drug targets. Ubiquitination, also known as ubiquitylation, regulates degradation of cellular proteins by the ubiquitin-proteasome system. This process involves the sequential action of ubiquitin-activating enzymes (E1), ubiquitin-conjugating enzymes (E2), and ubiquitin ligases (E3). Mammalian genomes encode approximately 12 E1 enzymes, 30–40 E2 enzymes, and 600 E3 enzymes. These enzymes target many protein substrates, and are therefore involved in a wide variety of biological pathways. In addition, ubiquitination does not always target a protein for degradation. For example, monoubiquitination of cell surface transmembrane receptors marks them for endocytosis, whereas polyubiquitination acts as a scaffold for ubiquitin-binding proteins. Disruption of the ubiquitin-proteasomal degradation pathway has been implicated in a wide range of human diseases, such as cancer, diabetes, and cardiovascular and neurodegenerative diseases. The diversity and protein substrate specificity of E3 enzymes allows them to play a major role in normal and disease-related pathways, identifying these enzymes as potential drug targets. Developing drug screening assays requires surveying the expression of not only the drug target, but also related genes with redundant or compensating functions that could possibly cause lower drug efficacy or off-target effects. This array includes ubiquitin ligases from all major E3 families, focusing on the most characterized and broadly expressed enzymes. Using real-time PCR, research studies can easily and reliably analyze the expression of a focused panel of ubiquitin ligases with this array.

For further details, consult the *RT² Profiler PCR Array Handbook*.

Sample & Assay Technologies

Shipping and storage

RT² Profiler PCR Arrays in formats E and G are shipped at ambient temperature, on dry ice, or blue ice packs depending on destination and accompanying products.

For long term storage, keep plates at -20°C.

Note: Ensure that you have the correct RT² Profiler PCR Array format for your real-time cycler (see table above).

Note: Open the package and store the products appropriately immediately on receipt.

Gene table: RT² Profiler PCR Array

Related products

For optimal performance, RT² Profiler PCR Arrays should be used together with the RT² First Strand Kit for cDNA synthesis and RT² SYBR[®] Green qPCR Mastermixes for PCR.

Product	Contents	Cat. no.
RT ² First Strand Kit (12)	Enzymes and reagents for cDNA synthesis	330401
RT ² SYBR Green qPCR Mastermix (8)*	For 4 x 384 assays in 384-well plates; suitable for use with real-time cyclers that do not require a reference dye, including: Bio-Rad model CFX384; Roche LightCycler 480 (384-well); all other cyclers	330501
RT ² SYBR Green ROX [™] qPCR Mastermix (8)*	For 4 x 384 assays in 384-well plates; suitable for use with the following real-time cyclers: Applied Biosystems models 7900HT, ViiA 7 (384-well blocks)	330521
RT ² SYBR Green Fluor qPCR Mastermix (8)*	For 4 x 384 assays in 384-well plates; suitable for use with the following real-time cyclers: Bio-Rad models iCycler [®] , iQ [™] 5, MyiQ [™] , MyiQ2	330511

* Larger kit sizes available; please inquire.

RT² Profiler PCR Array products are intended for molecular biology applications. These products are not intended for the diagnosis, prevention, or treatment of a disease.
